How to measure.

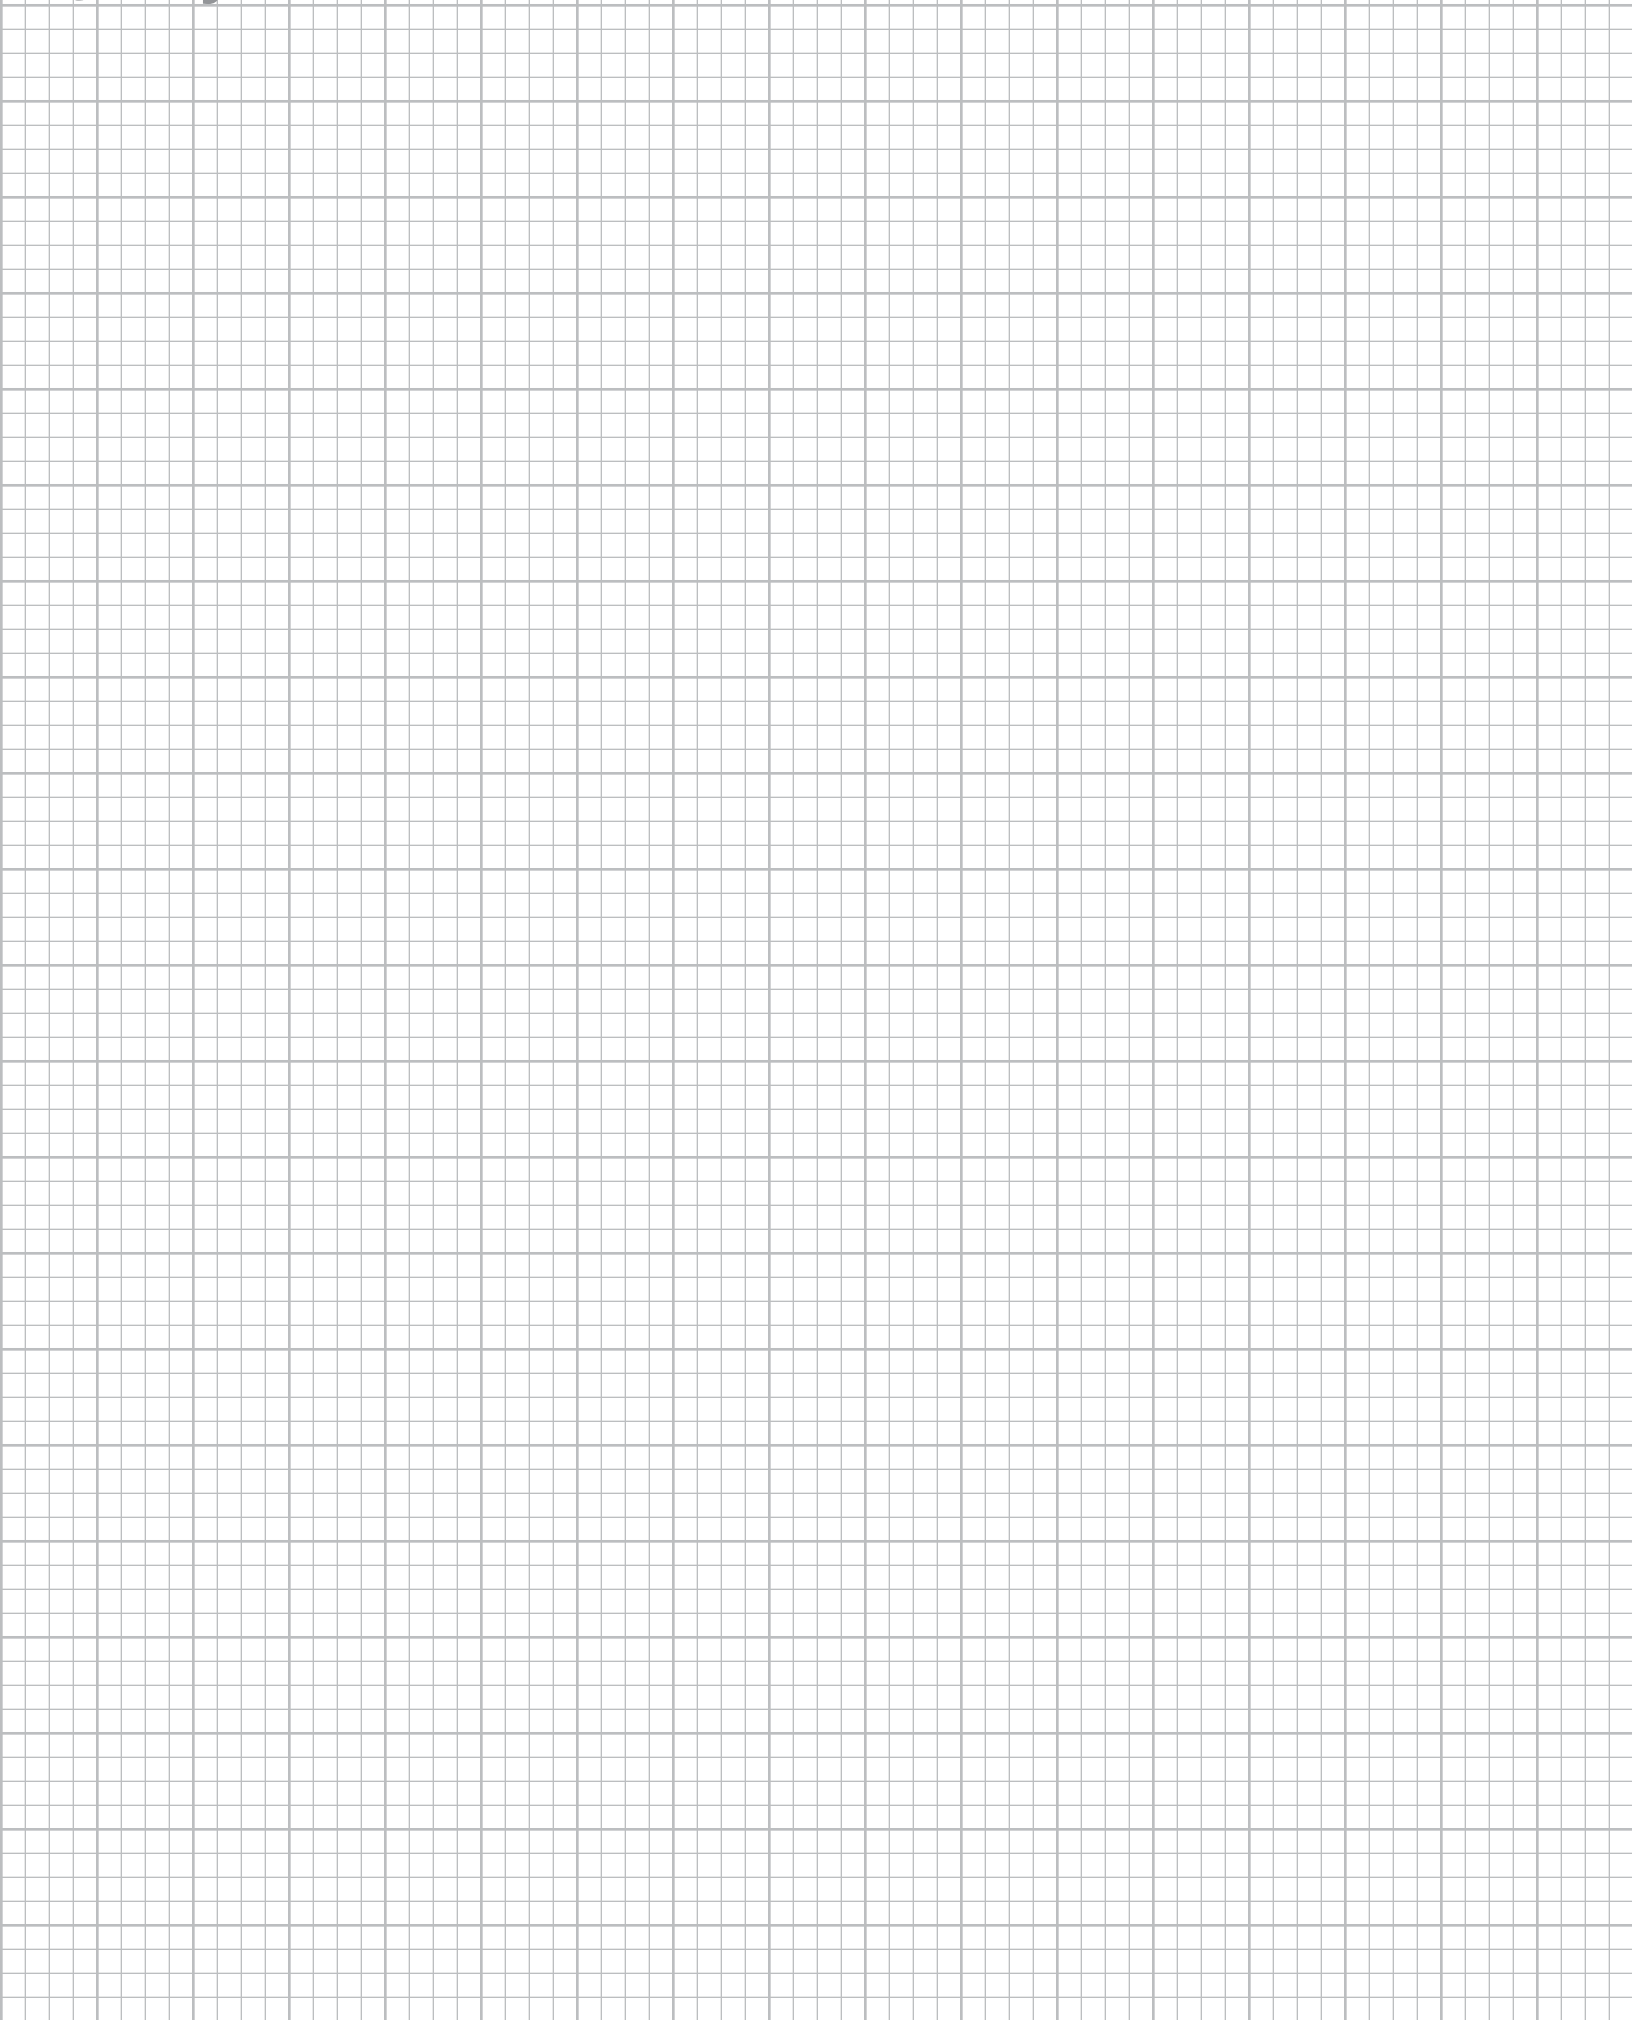

What you need:

- Tape measure
- Pencil
- Floor plan grid (provided with printable summary) or a piece of paper

Steps:

1. Start in a corner and measure, in inches, the distance to every item on that wall from the corner.
2. Do the same from every corner, marking down all measurements on your sketch. (See example).
3. Make sure to include the measurements from outlets, light switches, ledges and/or soffits.
4. Include window and door casing widths.
5. Note the height of windows and outlets from the floor.
